Dear Sir or Ma'am:

Corinth Gas & Water Department appreciates the opportunity to serve our community. We are committed to serve and protect the public's health and welfare by providing a safe, reliable, and sufficient water supply with quality service at a reasonable cost to our customers.

Our customer water rate has remained the same since 2012 whereas the costs of water treatment chemicals, energy, materials, and fuel increased in every aspect over this time period. To ensure CGW continues to meet the financial demands of increased operating expenses so we can continue providing a safe and reliable water supply to our customers and meet regulatory requirements established by the Environmental Protection Agency (EPA), we will implement the following rate increases: the water rate will increase \$0.25 (25 cents) from the current rate to \$4.25 per 100 Cubic Feet. The monthly water meter base rates will increase \$2.00 from the current rate based on the size of the meter. The monthly unmetered fire sprinkler connection rates will increase \$5.00 from the current rate based on the size of the connection. The water tap fees for 1 inch and above water meters will be the actual cost for the service. These rates will go in effect June 1, 2026.

CGW encourages water customers to install a cut-off valve on the customer's side of the meter in the event of a leak. Effective June 1, 2027, CGW will charge customers a cut-off fee for service calls conducted after hours to turn off a meter due to a water leak on the customer's side. CGW will not charge a fee if the service is requested during normal business hours.

A complete list of our water rates and fees is listed on our website: corinthgasandwater.com. We value you as a customer, and our commitment is to provide you safe water supply at the lowest cost possible. Thank you again for the opportunity to serve you.

Sincerely;

John M. Rhodes
